Unique Commercial Flooring – Since 1925

Decorative, Durable and Slip/Chemical Resistive Flooring

Allegheny Installations is a full-service commercial flooring installer. Our highly skilled mechanics will furnish and install any size project throughout the tri-state area. We are committed to being the regional leader for specialty food and beverage flooring systems.

Industry Knowledge

Food processing is a multi-billion dollar industry that's an essential part of everyday life. Bakeries, meat and poultry plants, bottling lines, dairies, canneries, and breweries need flooring systems formulated to withstand hot cooking oil, grease, food and mineral acids, strong alkalis, and acid-based cleaners. When it comes to your floor, one size doesn't fit all. You need a system that is designed to meet your demands. Worker protection and food safety are critical in this highly regulated market. Our commercial flooring systems comply with all regulations. That's why our floor systems are the top choice for food processors.

The Smart Choice

Well-designed functional features of our floor systems make them the perfect choice for a wide array of applications. Our specialized floors are designed to withstand continuous thermal cycling from freezing to 225°F. Grease and stain resistance make maintenance easy and increases the life of the floor. Additionally, our slip resistive floors contribute to the safety and efficiency of your workers.

Our Mission

The foundation of our success is our commitment to providing superior service and maintaining long-term client relationships, while offering nothing less than customer satisfaction. We pledge to continue to be responsive to the needs of our clients. Since 1925, three generations of the Toole family have built a long-standing reputation for exceptional quality craftsmanship and dedication to our clients.
