

# Firehouse Flooring

Firehouse floors need to be as tough as the men and women who walk those grounds. They need to hold up to incredibly heavy machinery, constant foot traffic, sanitization chemicals, tire wear, and trucks.

## Functionality

Fire floors need to be designed with the following factors in mind:

- Extreme slip resistance
- Durability – Impermeable modern technology
- Longevity – Chemical resistance
- Aesthetics – Color, sheen, and design
- Custom visual design to map out pathways, parking spaces, and caution area
- Moisture resistant – prevent future issues
- Low Maintenance – User friendly
- Low or Zero Levels of VOC's (Volatile Organic Compounds)
- Green-friendly Planning

## What's New in Firehouse Flooring

New and improved coatings have made a huge difference in floor technology over the last few years. Newer coatings last longer and protect better than ever before. Durability for commercial floors is now the expectation, not the exception, and can be achieved across a wide range of floor types we install.

Allegheny Installations provides wall-to-wall seamless floor solutions to keep cracks at bay, providing a surface that is safe.

## What You Can Expect from Allegheny Installations

When you hire Allegheny Installations, you are hiring decades of flooring expertise and customer service, specifically in epoxy, terrazzo and polished concrete floors. We have a wealth of customization options at our disposal – when we say that our floors are custom designed, we mean it. Your floor will be a one-of-a-kind, produced for both your functional and aesthetic needs.

EASY MAINTENANCE

LONG LASTING

SLIP RESISTANT FLOORING
