

# Educational Facilities

From the classroom to the lunchroom, floors need to support the students, teachers, and administrators that build our future. No matter what the space, durability is the primary concern. Educational facilities are also beholden to super-strict budgets and immovable deadlines.

Kitchens need to be able to support large Cafeterias. Gymnasiums need to keep physical activity safe. Auditoriums need to be able to handle plays, concerts, and presentations. Restrooms and locker rooms need to be easy to clean and sanitize. Every room has specific needs but also requires flexible functionality at the same time.

## Engineering factors:

When designing a floor for a scholastic building, durability and longevity are two primary concerns. School district budget issues are always contentious, and you never know when you will have an opportunity to replace it. Furthermore, any new floor should require as little maintenance as possible. Your custodial staff has enough other responsibilities and a new floor should not add to them.

When Allegheny Installations designs your custom floor, we will consider dozens of factors, which include:

- Durability – Impermeable modern technology makes floors last a very long time
- Longevity – chemical resistances, slip resistance
- Aesthetics – Color, sheen, and design

## What You Can Expect from Allegheny Installations:

When you hire Allegheny Installations, you are hiring decades of flooring expertise and customer service, specifically in epoxy and polished concrete floors. We have a wealth of customization options at our disposal – when we say that our floors are custom designed, we mean it. Your floor will be a one-of-a-kind, produced for both your functional and aesthetic needs.

AESTHETICALLY PLEASING  
DURABILITY  
LONGEVITY
